

Animal Groups

Overview:

In this Science topic we will be learning about five different animal groups. We will learn that animals are either mammals, fish, amphibians, reptiles and birds. We will learn the features that are unique to each animal group.

What I already know...

That humans are animals.

That all humans have 5 senses to help them to find out about the world.

By the end of this unit...

I will be able to name 5 animal groups.

I will be able to describe the features of each animal group.

I will be able to sort animals into their groups and explain how I know which group they belong to.

Key Vocabulary

mammal

amphibian

fish

reptile

bird

Key Questions
